

Honeycomb Motorisation

Easily operate the motorised honeycomb shade with a single tap.

The Auto-Brake feature halts the shade upon encountering obstructions, keeping children and pets safe.

Our dual motors enable effortless adjustment of the Top Down Bottom Up from the top or bottom and an easy transition between light filtering and room-darkening fabrics on the Day & Night honeycomb shades.

Safely charge the shades motor's lithium-ion battery with our award-winning charging wand.

Control an unlimited number of shades per channel with a well-designed remote featuring shortcut keys.
